Section 2 - Hazards identification

CLASSIFICATION OF THE PRODUCT
Product is not classified as dangerous according to guideline 199/45/EG or regulation EC/1272/2008

LABELS ELEMENTS
Labelling according to EC/1272/2008 (substances) and 1999/45/EC (preparations)

GENERAL INFORMATION
Low risk: Product can only form ignitable mixtures or burn if it is heated or exposed to open flame at temperatures above the flash point.

OVERHEATING
Incorrect processing of PTFE above 325°C (620°F) can lead to the formation of low molecular decomposition products. It is therefore important to prevent overheating of molten material (see section 10)

FIRE HAZARD
Toxic gases are produced during burning (see section 10)

SPARKING
No risk of electrostatic charging

DANGER OF SLIPPING
Films or PTFE waste lying on the floor can cause a danger of slipping.

Section 4 - First aid measures

**INHALATION**
Inhalation of fumes if product exposed to extreme temperatures: Remove patient from exposure, keep warm and at rest. Use suitable respiratory protection measures. If breathing is irregular or if it has stopped, proceed with artificial respiration. Obtain medical attention.

**EYE CONTACT**
This product is an inert solid. In case particles come into the eye, remove by irrigating with eye wash solution or clean water, holding the eyelids apart. Obtain medical attention.

**SKIN CONTACT**
With hot product: Cool the affected areas with plenty of cold water. Cover with a clean cloth or sterile gauze and call for medical help. Do not try to remove the product from the skin or remove soiled clothing as this may cause the injured skin tissue to be torn off.

**INGESTION**
First aid is normally not necessary.
